

BLUE SKY BLUEBERRIES

“CEU AZUL”

Naturally high in antioxidants and disease prevention compounds

Grown under sustainable and ecological enhancement farming practices

Valley Springs, Calaveras County, CA
www.blueskyblueberries.com

Our blueberries are **farm fresh** and picked at the peak of ripeness.

Our blueberries are selected and harvested one by one by skilled workers. This process is time consuming but we feel it is important to bring the customer fresh and flavorful fruit.

Naturally grown, **Blue Sky Blueberries** are farmed utilizing a nutrient recycling approach and pests are controlled by natural predators, beneficial insects and, if needed, only organic products.

Find more information about the farm by visiting
www.blueskyblueberries.com

Blue Sky Blueberries support the establishment of native plant and animal species while following sound land stewardship. To achieve this specific habitats are provided for example, bee houses, a bat house, owl box, duck protection platform, raptor perch, wildflowers, and specific flowering shrubs and trees.

Blue Sky Blueberries are **only available** for a short time every year from **mid-May through late-June**. We offer fruit in bulk or in ½ pint clamshells. U-pick is available by appointment only.

Our blueberries stay fresh for easily 7 to 10 days refrigerated or they can be frozen and stored up to a year.
